## Experience

### InBody USA

Cerritos, CA

SOFTWARE ENGINEER

Aug. 2017 - Present

- Collaborated with Marketing team to design and develop a custom Shopify website with the plan to localize for international versions.
- Created custom Shopify CMS sections for site administrators to publish changes on custom pages instantly and have the ability to split test.
- Developed RESTful Web API Services along with new features for the administrative dashboard in the InBody Challenge web application.
- Refactored internal Sales ERP system built with Node.js for better readability.
- Implemented Twilio and Trumpia API for SMS delivery via internal web applications.

### "An Inside Connection" a ReWork Work Company

Newport Beach, CA

.NET DEVELOPER

Sep. 2016 - July 2017

- Built a minimal viable product web application that allows recruiters and candidates to connect via referrals.
- Implemented the Candidate Referral System which allows the user to request a referral for a job listing from a person that has a common work history or education.
- Developed the Open Graph meta tags feature to dynamically hydrate on a webpage, along with an administrator feature to allow the site administrator to update the tags instantly.
- Utilized a C# ASP.NET MVC 5 with WebAPI 2 & MSSQL backend to support a frontend running jQuery AJAX & AngularJS.
- Project also implemented a state machine via the Stateless .NET Library, AngularJS routing for responsive navigation, and SignalR for real-time messaging. Employed an agile development process with daily standups and Trello for task management.

### Aftermarket Performance Express

Livermore, CA

SALES DIRECTOR

Jun. 2012 - Feb. 2016

- Generated client-facing web marketing material using HTML, CSS & Javascript.
- Managed the implementation of new NetSuite technology as a Sales ERP.
